

RUBBER FLOORING SOLUTIONS FOR
SPORTS & FITNESS

Why choose **REGUPOL**?

For over three decades, **REGUPOL** has been synonymous with quality rubber flooring solutions in Australia's fitness and sports sectors. With a legacy of 35 years, we have been the trusted partner for the nation's top sports and fitness chains, ensuring their clients have the perfect environment to pursue their fitness aspirations.

We understand that the foundation of any fitness facility is its flooring. That's why we offer rubber flooring solutions that cater to every space within your establishment—from the welcoming reception area to the dynamic workout zones and even the 'end-of-trip' parking spaces. Our **REGUPOL everroll** rubber fitness floors are designed to support athletes by providing a surface that is not only comfortable and safe but also enhances performance and protects both the user and the equipment.

REGUPOL Australia stands out in the fitness flooring industry for its commitment to sustainability and quality. With a focus on recycled rubber flooring, our company offers products that are not only eco-friendly but also provide superior impact resistance.

Choosing **REGUPOL** means opting for a partner that understands the Australian culture of fitness and sports. We take pride in contributing to the development of healthy lifestyles and helping Australians achieve their sporting goals. With a wide range of colours, graphics, and functional markings, our floors are not just practical but also aesthetically pleasing, allowing you to create an inviting and motivational space for athletes of all levels.

Our rubber flooring solutions are the cornerstone of a successful fitness or sports facility. They are durable, safe, comfortable, and sustainable—the ideal choice for those who demand the best for their athletes and clients.

So if you're looking for rubber flooring for your sports and fitness areas, you've come to the right place because whatever you need:

We've got it covered.

DESIGNS & ACCESSORIES

UNDERSTANDING THE ICONS USED THROUGHOUT

Natural without sealant

Generally, our fitness floors are laid without a sealant. This has a positive effect on the slip-resistance, the overall feel and matte appearance.

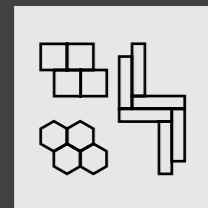

Our products: REGUPOL everroll range

Optional sealing

Our REGUPOL sealer makes the floor easier to clean, especially in those areas of heavy footfall or where extra hygiene is crucial.

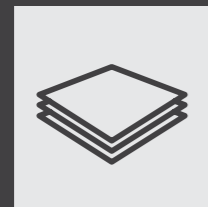

Our products: REGUPOL everroll range

Modular tiles

Available as pre-cut modular tiles. Design your own creative space, by using different coloured squares, hexagons or rectangles.

Our products: REGUPOL everroll range

Multi-layer system build-up

Having multiple layers adds elasticity and resilience, and aids in dampening impact sound transmission. We can assist you in selecting the ideal acoustic solution.

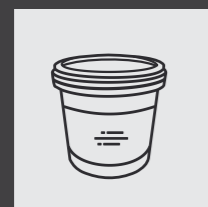

Our products: REGUPOL everroll impact, REGUPOL sonusfit m-series

Individual design

You have the option of including logos, lines or lettering into your floor. This can be done as inlays within the floor or using full colour UV inkjet technology.

Our products: REGUPOL everroll range

Primers, moisture barriers, adhesives and sealer

For optimal performance and peace of mind, REGUPOL adhesives and sealers are not only tailored to your needs but are also guaranteed to work with our flooring products. If you have any questions about primers, moisture barriers, adhesives or sealer just ask!

The right choice for your facility

Selecting the right floor covering for a sports or fitness club is a critical decision that impacts not only the aesthetics but also the functionality and safety of the space.

As a facilities manager or fitness club owner, it is important to choose a flooring solution that can withstand the rigours of daily workouts and heavy equipment. When considering new flooring, it is essential to balance the initial investment with the long-term benefits, such as reduced maintenance costs and enhanced member satisfaction.

Ultimately, the goal is to create a safe, comfortable, and inviting workout space that encourages members to return.

Our knowledgeable team is ready to guide you through the detailed process of selecting flooring that optimises both impact resistance and sound quality. So you don't have to sweat the physics.

OUR FLOOR FOR RECEPTION AREAS

Get the best reception

Our REGUPOL everroll rubber fitness floors are not only perfect for the studio but also make a striking statement in foyers and reception areas, seamlessly extending your brand's presence.

They set the stage for a memorable first impression that lasts, welcoming visitors with comfort underfoot, safety with slip-resistance, and the assurance of durability, even in the most heavily trafficked spaces. Because we understand that a good first impression is the first step to a lasting relationship with your clients, our floors are designed to ensure that every entrance is an entrance to remember.

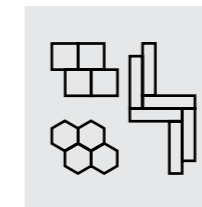

Available in:

Natural or Sealed rolls

Ranges: REGUPOL everroll classic, vitality or ultimate
Thickness: 4 mm or 8 mm

Refer to page 36 for information on colours and ranges.

Modular tiles

Create your own designs from our **REGUPOL everroll** ranges of different coloured squares, hexagons or rectangles.

Our advice:

Lines, logos and designs can be applied to your floor – just let us know what you want and we'll make it happen.

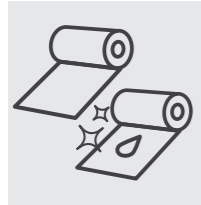

OUR FLOOR FOR CHANGING AREAS

Change the perception of changing areas

You want your clients to feel comfortable and at ease in your changing facilities. **REGUPOL everroll rubber fitness flooring is pleasant to walk on with bare feet or footwear, and reduces impact and ambient noise.**

For areas where studded sports shoes are worn, 8 mm rubber flooring is ideal. It offers comfort and long-lasting durability, and can withstand the extra wear from athletic footwear.

Available in:

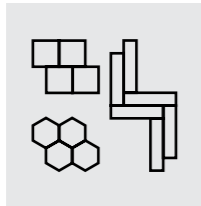

Natural or Sealed rolls

Ranges: **REGUPOL everroll classic, vitality or ultimate**

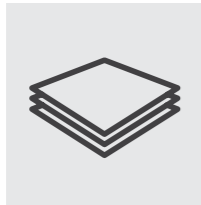

Thickness: 4 mm or 8 mm

Refer to page 36 for information on colours and ranges.

Modular tiles

Create your own designs from our **REGUPOL everroll** ranges of different coloured squares, hexagons or rectangles.

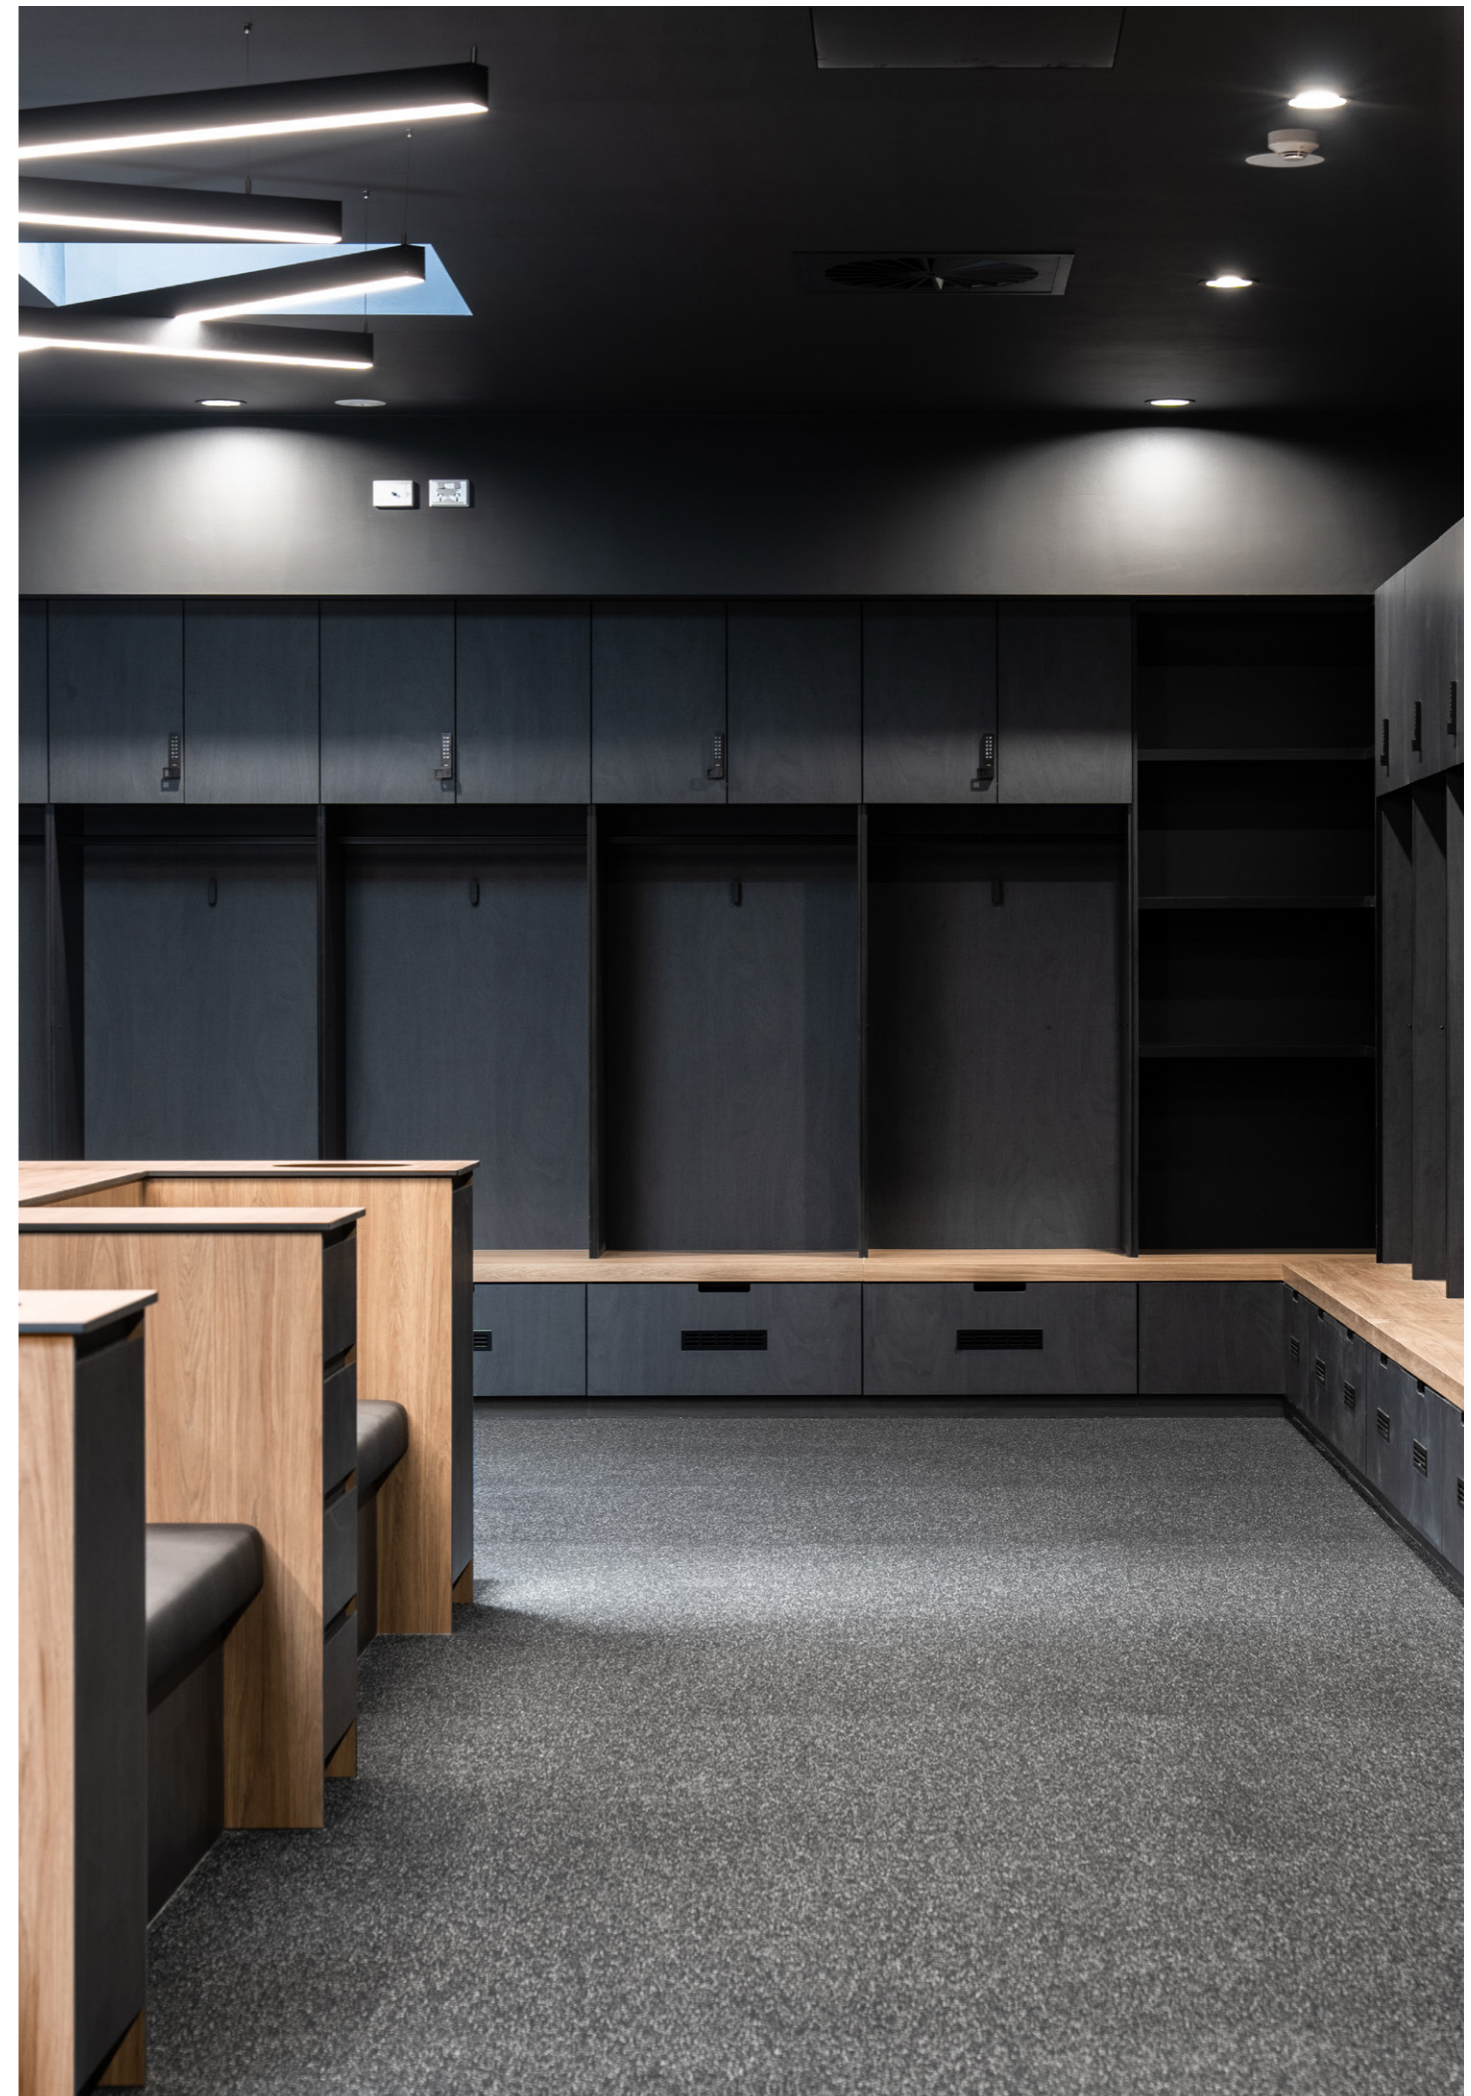

Multi-layer system build-up

Ranges: **REGUPOL everroll impact**

A multi-layer system includes a wear layer with a shockpad underlay.

Refer to page 14 for information.

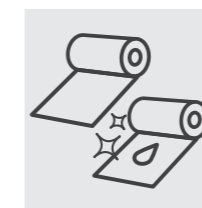

OUR FLOOR FOR WEIGHTS TRAINING

Floors that can take weight

REGUPOL rubber fitness floors are built to be robust, protective, slip-resistant and comfortable – a safe and secure base for training with dumbbells and free weights.

Our floors don't just support the fitness enthusiasts; they provide a harmonious blend of colour, durability, and resilience. Engineered to endure the most rigorous workouts, capable of handling heavy weights, and available in a range of colours that enhance any gym's aesthetic, the robust surface withstands even the most intense training sessions. This ensures a lasting appearance that reflects the strength and dynamism of those who use the space.

Available in:

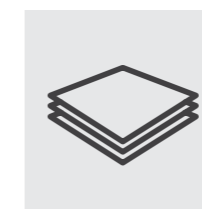

Natural or Sealed rolls

Ranges: REGUPOL everroll classic or ultimate

Thickness: 8 mm or 12 mm

Refer to page 36 for information on colours and ranges.

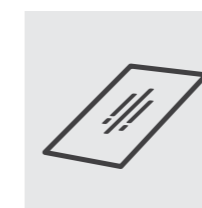

Multi-layer system build-up

Ranges: REGUPOL everroll impact, REGUPOL sonusfit m-series

A multi-layer system includes a wear layer with an acoustic underlay.

Refer to page 14 for information.

Individual design

You have the option of including logos, lines or lettering into your floor. This can be done as inlays within the floor or using full colour UV inkjet technology.

Refer to page 34 for information.

OUR FLOOR FOR NOISE & VIBRATION

The ultimate underlay for your vibe

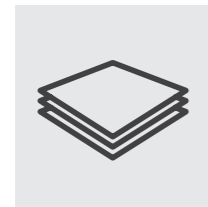

Sound insulation is a critical factor for fitness studios in mixed-use buildings, where diverse activities coexist in proximity.

The **REGUPOL sonusfit** range represents a significant advancement in the design of fitness and sports flooring. It is specifically engineered to minimise structure-borne noise while maintaining the essential functionality required for sports activities. The range's effectiveness is attributed to the strategic combination of elastomers, each selected for its unique shock-absorbing characteristics, ensuring optimal insulation against noise transmission.

Moreover, the integration of the **REGUPOL sonusfit** range with the **REGUPOL everroll** collection enhances the overall performance, drawing upon **REGUPOL's** extensive experience in vibration engineering and a profound understanding of sports flooring requirements.

Collaborating with our acoustics experts can lead to optimised designs that address the unique acoustic challenges presented by fitness studios in mixed-use developments.

Available in:

Multi-layer system build-up
Ranges: **REGUPOL everroll impact**, **REGUPOL sonusfit m-series**, **REGUPOL sonusfit c-series**

OUR FLOOR FOR CARDIO & STRENGTH TRAINING

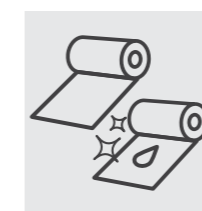

From heartbeats to heavy lifts

Elevate your fitness space with **REGUPOL everroll**, the ultimate flooring solution for both cardio and strength training areas. Designed to withstand the rigorous demands of training activities.

Its superior cushioning properties not only protect your equipment but also offer a stable and supportive surface, reducing strain on joints and enhancing overall workout performance. Whether it's the relentless pace of treadmills or the intense loads of cable training, **REGUPOL everroll** stands up to the challenge, ensuring a safe, resilient, and long-lasting foundation for your fitness journey.

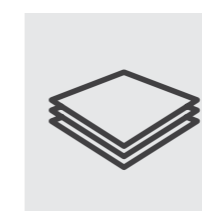

Choose **REGUPOL everroll** for a flooring that's as robust and dynamic as your workouts.

Available in:

Natural or Sealed rolls
Ranges: **REGUPOL everroll classic, vitality or ultimate**
Thickness: 4 mm or 8 mm

Refer to page 36 for information on colours and ranges.

Multi-layer system build-up
Ranges: **REGUPOL everroll impact, REGUPOL sonusfit m-series**
 A multi-layer system includes a wear layer with an acoustic underlay.

Refer to page 14 for information.

Our advice:

Our Flooring Designer lets you virtually install and view your preferred layout, design and colours in a fitness studio scenario.

OUR FLOOR FOR CROSSFIT

The ultimate arena for crossfit conquerors

Unleash the beast with REGUPOL everroll rubber fitness floors! These floors are the ultimate battleground for your crossfit challenges. Built to withstand the intensity of your most explosive workouts, they're perfect for jumps, burpees, squats, and rope skipping, ensuring every move is executed with unmatched stability and support.

Our sports flooring is a fortress, protecting athletes and the sub-base even when the action gets tough and the volume cranks up. And with our selection of sleek, dark-toned surfaces, your crossfit area will not just look the part—it'll be the heart of where passion meets performance.

For those who push their limits, **REGUPOL everroll** has got you covered with our 12 mm flooring. This is the go-to choice for ultra-high intensity training, providing the ultimate support and resilience needed for the most demanding workouts.

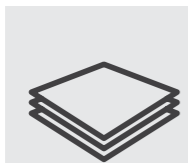

Choose **REGUPOL everroll** and transform your space into a powerhouse of fitness and determination!

Available in:

Natural rolls
Ranges: **REGUPOL everroll classic**
Thickness: 8 mm and 12 mm

Refer to page 36 for information on colours.

Multi-layer system build-up
Ranges: **REGUPOL everroll impact, REGUPOL sonusfit m-series**
A multi-layer system includes a wear layer with an acoustic underlay.
Refer to page 14 for information.

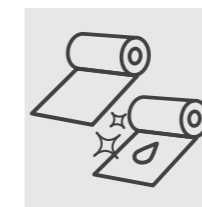

OUR FLOOR FOR FUNCTIONAL TRAINING

Functionally fun

Our rubber floors are designed with enough 'give' to support bodies and joints, enabling your customers to train with their own body weight much more effectively.

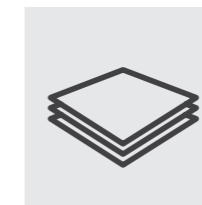

Moreover, the flooring is engineered to provide an ideal platform for a variety of exercises, including those performed while standing or in support stances. These surfaces boast exceptional durability and are designed to safeguard the underlying substrate. This is particularly beneficial during workouts involving substantial equipment such as kettlebells, dumbbells, and battle ropes, ensuring both safety and longevity.

Available in:

Natural or Sealed rolls
Ranges: REGUPOL everroll classic or ultimate
Thickness: 8 mm or 12 mm

Refer to page 36 for information on colours and ranges.

Multi-layer system build-up
Ranges: REGUPOL everroll impact, REGUPOL sonusfit m-series
 A multi-layer system includes a wear layer with an acoustic underlay.
 Refer to page 14 for information.

OUR FLOOR FOR INDOOR CYCLING

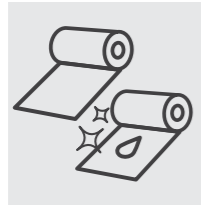

In a spin? No worries.

In cycling, it's not just the athletes that test themselves, the bikes exert force on the floor, too. But that's no problem for our REGUPOL everroll rubber fitness floors, as they help to absorb this force transmission.

Plus, they're robust, durable and sound-reducing. To further enhance the indoor cycling experience, our **REGUPOL** multi-layer systems are designed to significantly reduce vibration disturbances, ensuring a quieter and more focused workout environment.

For areas used with cleated shoes, we recommend 8 mm thick flooring to increase comfort and deal with the extra wear.

Available in:

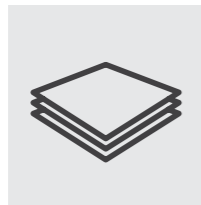

Natural or Sealed rolls

Ranges: REGUPOL everroll classic, vitality or ultimate

Thickness: 4 mm or 8 mm

Refer to page 36 for information on colours and ranges.

Multi-layer system build-up

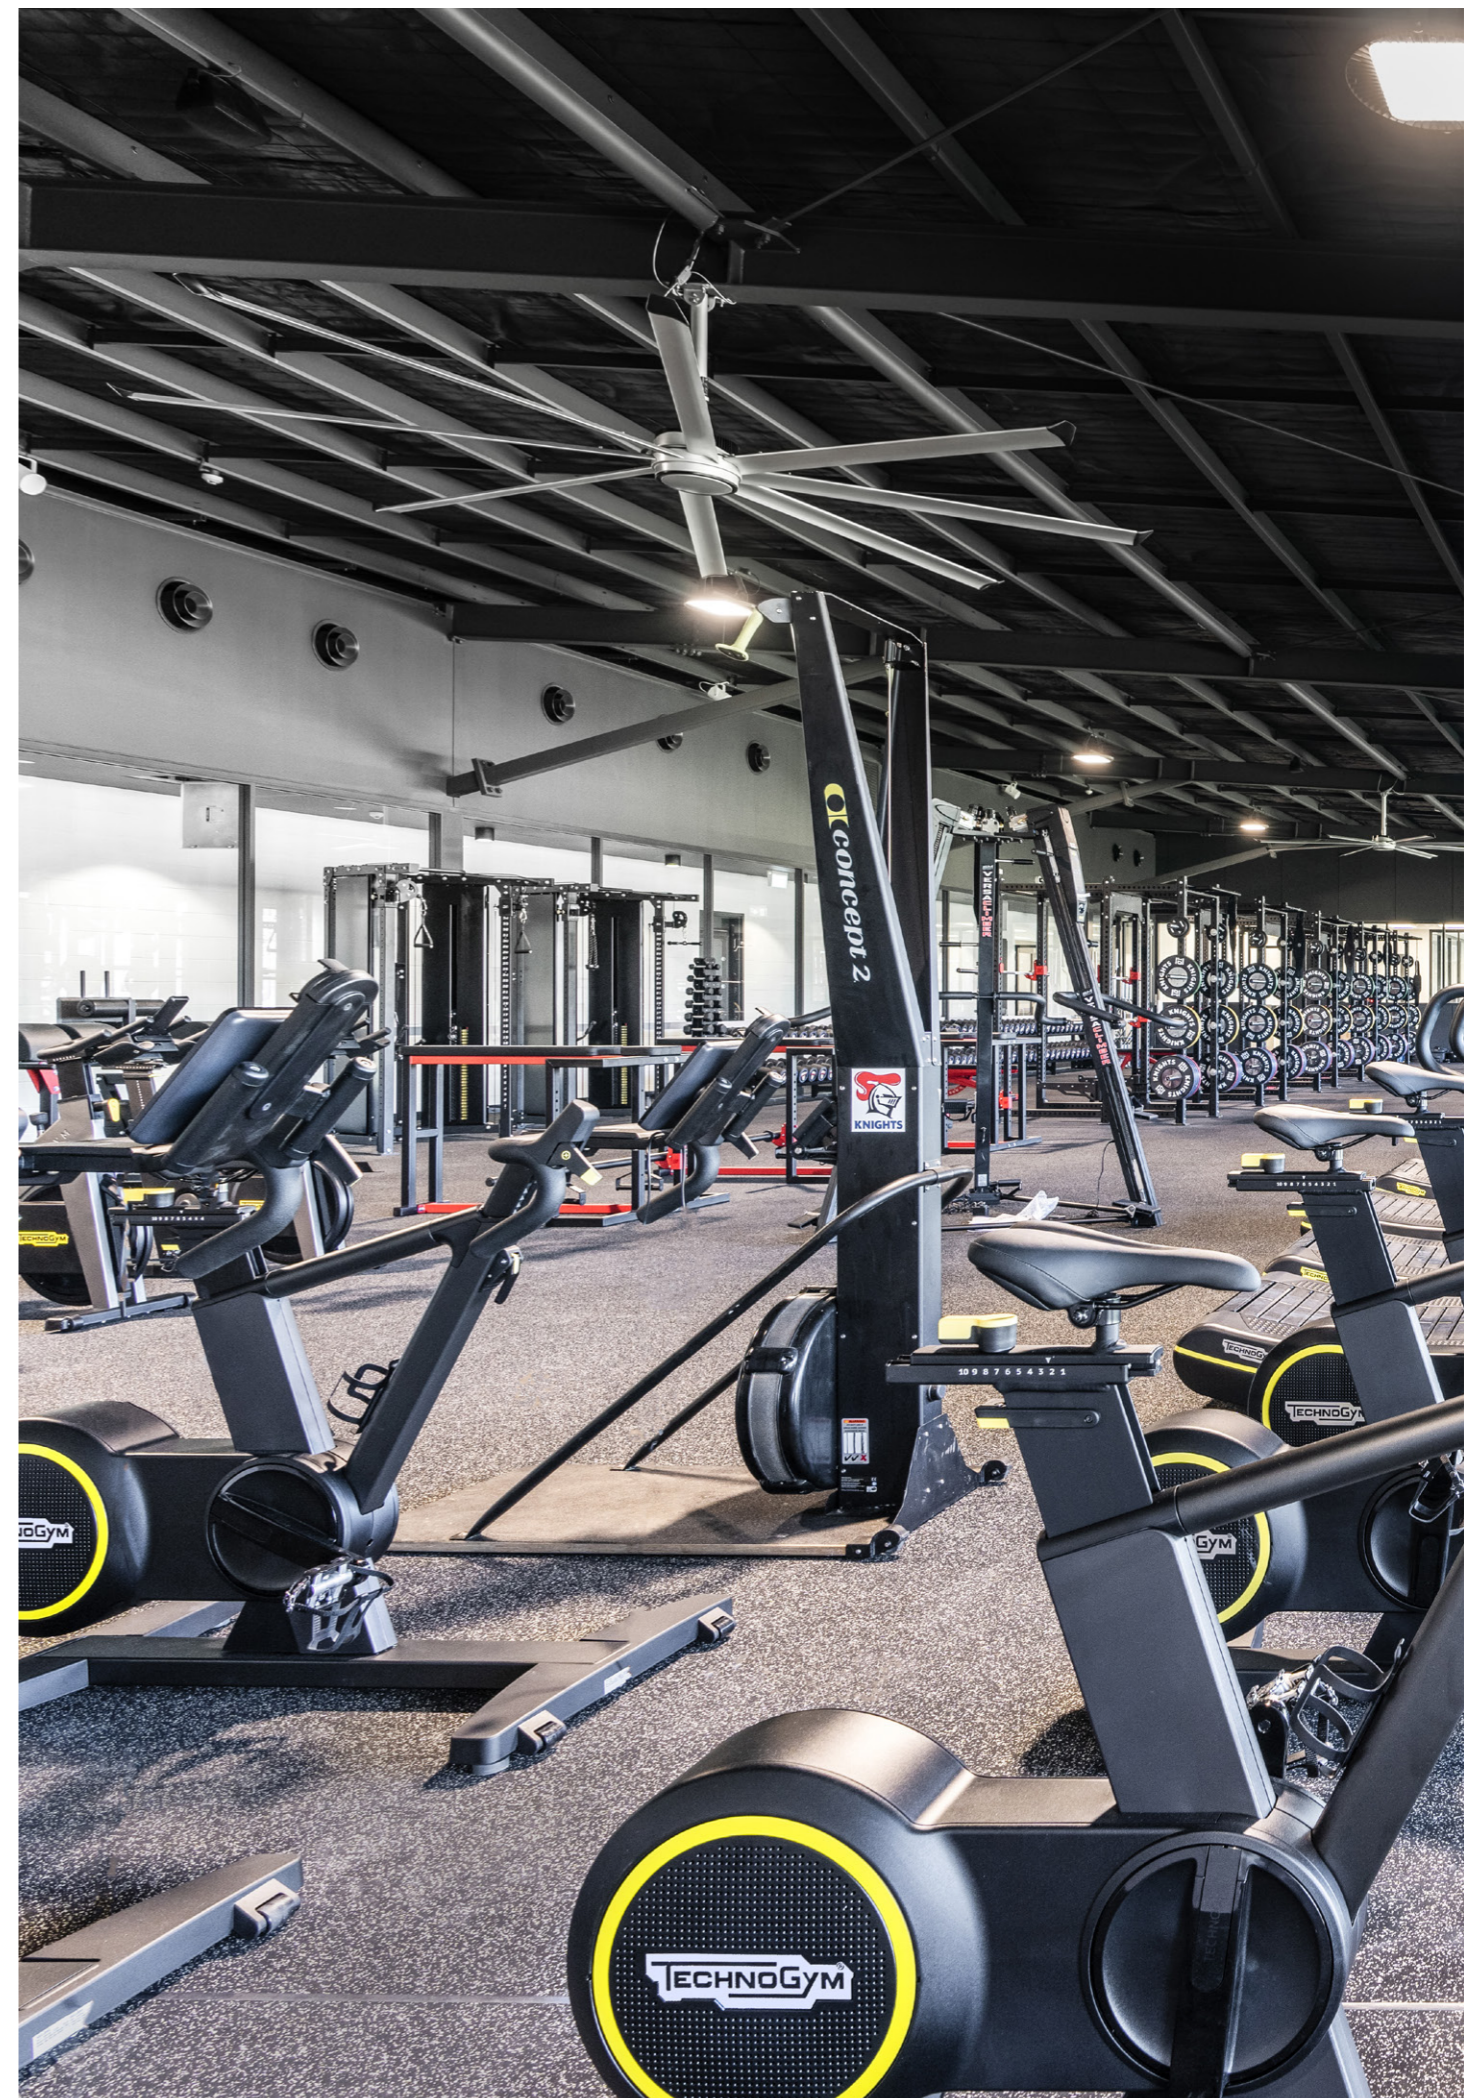

Ranges: REGUPOL everroll impact, REGUPOL sonusfit m-series

A multi-layer system includes a wear layer with an acoustic underlay.

Refer to page 14 for information.

Our advice:

Brighten up your spin room with inspirational messages or colours – or create a cool, urban look with grey tones. Check out our colours at the back of the brochure.

OUR FLOOR FOR GROUP TRAINING/ AEROBICS

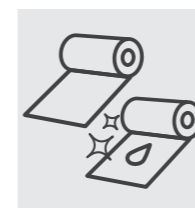

Feel the beat and find your feet

For athletes and fitness enthusiasts alike, the foundation of any sport or physical activity is a reliable, secure surface. REGUPOL everroll rubber fitness flooring is designed to meet this essential need with its superior slip-resistant properties, ensuring that every movement is performed with both safety and precision.

The advanced elasticity of REGUPOL everroll rubber fitness floors extends beyond mere comfort; it's a feature that actively reduces the impact on the body. This cushioning effect enhances performance by providing stable support during the most demanding of exercises. Whether it's for high-intensity workouts, group training sessions, or individual fitness routines, REGUPOL everroll is the smart choice for those who take their health and athletic performance seriously.

It's not just a floor; it's a foundation for excellence in sports and fitness.

Available in:

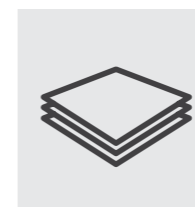

Natural or Sealed rolls

Ranges: REGUPOL everroll classic, vitality or ultimate

Thickness: 4 mm or 8 mm

Refer to page 36 for information on colours and ranges.

Multi-layer system build-up

Ranges: REGUPOL everroll impact, REGUPOL sonusfit m-series

A multi-layer system includes a wear layer with an acoustic underlay.

Refer to page 14 for information.

OUR FLOOR FOR PHYSIOTHERAPY

Gently does it

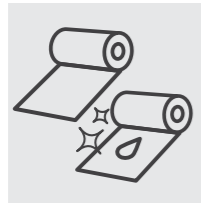

REGUPOL everroll flooring delivers comfortable support for both patients and physiotherapists.

Patients benefit from the floor's slip resistance, unique feel and colourful design options. During therapy sessions, the body receives optimal support.

Our floor surface also supports the physiotherapists and staff, as they spend a lot of their time on their feet – and even some time kneeling or lying beside their patients.

Opting for sealed floors can be a practical choice, as they are designed to be more resistant to spills, which ultimately makes them quicker and easier to clean and maintain over time.

Available in:

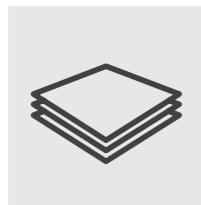

Natural or Sealed rolls

Ranges: REGUPOL everroll classic, vitality or ultimate

Thickness: 4 mm or 8 mm

Refer to page 36 for information on colours and ranges.

Multi-layer system build-up

Ranges: REGUPOL everroll impact, REGUPOL sonusfit m-series

A multi-layer system includes a wear layer with an acoustic underlay.

Refer to page 14 for information.

Thickness: 4 mm or 8 mm

Refer to page 36 for information on colours and ranges.

Multi-layer system build-up
Ranges: REGUPOL everroll impact, REGUPOL sonusfit m-series
 A multi-layer system includes a wear layer with an acoustic underlay.
 Refer to page 14 for information.

OUR FLOOR FOR END-OF-TRIP

Where rubber meets the road

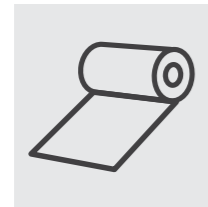

An end-of-trip facility is a dedicated space within a building designed to support individuals who choose active transportation methods, such as cycling, to reach their workplace. These facilities typically include amenities like secure bicycle parking, lockers, and change rooms.

End-of-trip facilities await, ready to brave the elements of adventure. They're not just tough; they're EOT tough—engineered to take on the relentless challenge of bike cleats, and the unpredictable elements of dirt and water straight from the streets.

Our 8 mm **REGUPOL everroll** rubber flooring is the hero your space deserves. It's the ultimate defender against the daily duel with athletic footwear, promising unmatched durability and a lifespan that laughs in the face of wear and tear.

But why stop at tough? Transform your EOT area into a vibrant canvas with our kaleidoscope of colours. Create a masterpiece underfoot with integrated logos, dynamic markings, and directional signs that do more than guide—they inspire.

Available in:

Natural or Sealed rolls

Ranges: **REGUPOL everroll classic, ultimate**

Thickness: 8 mm

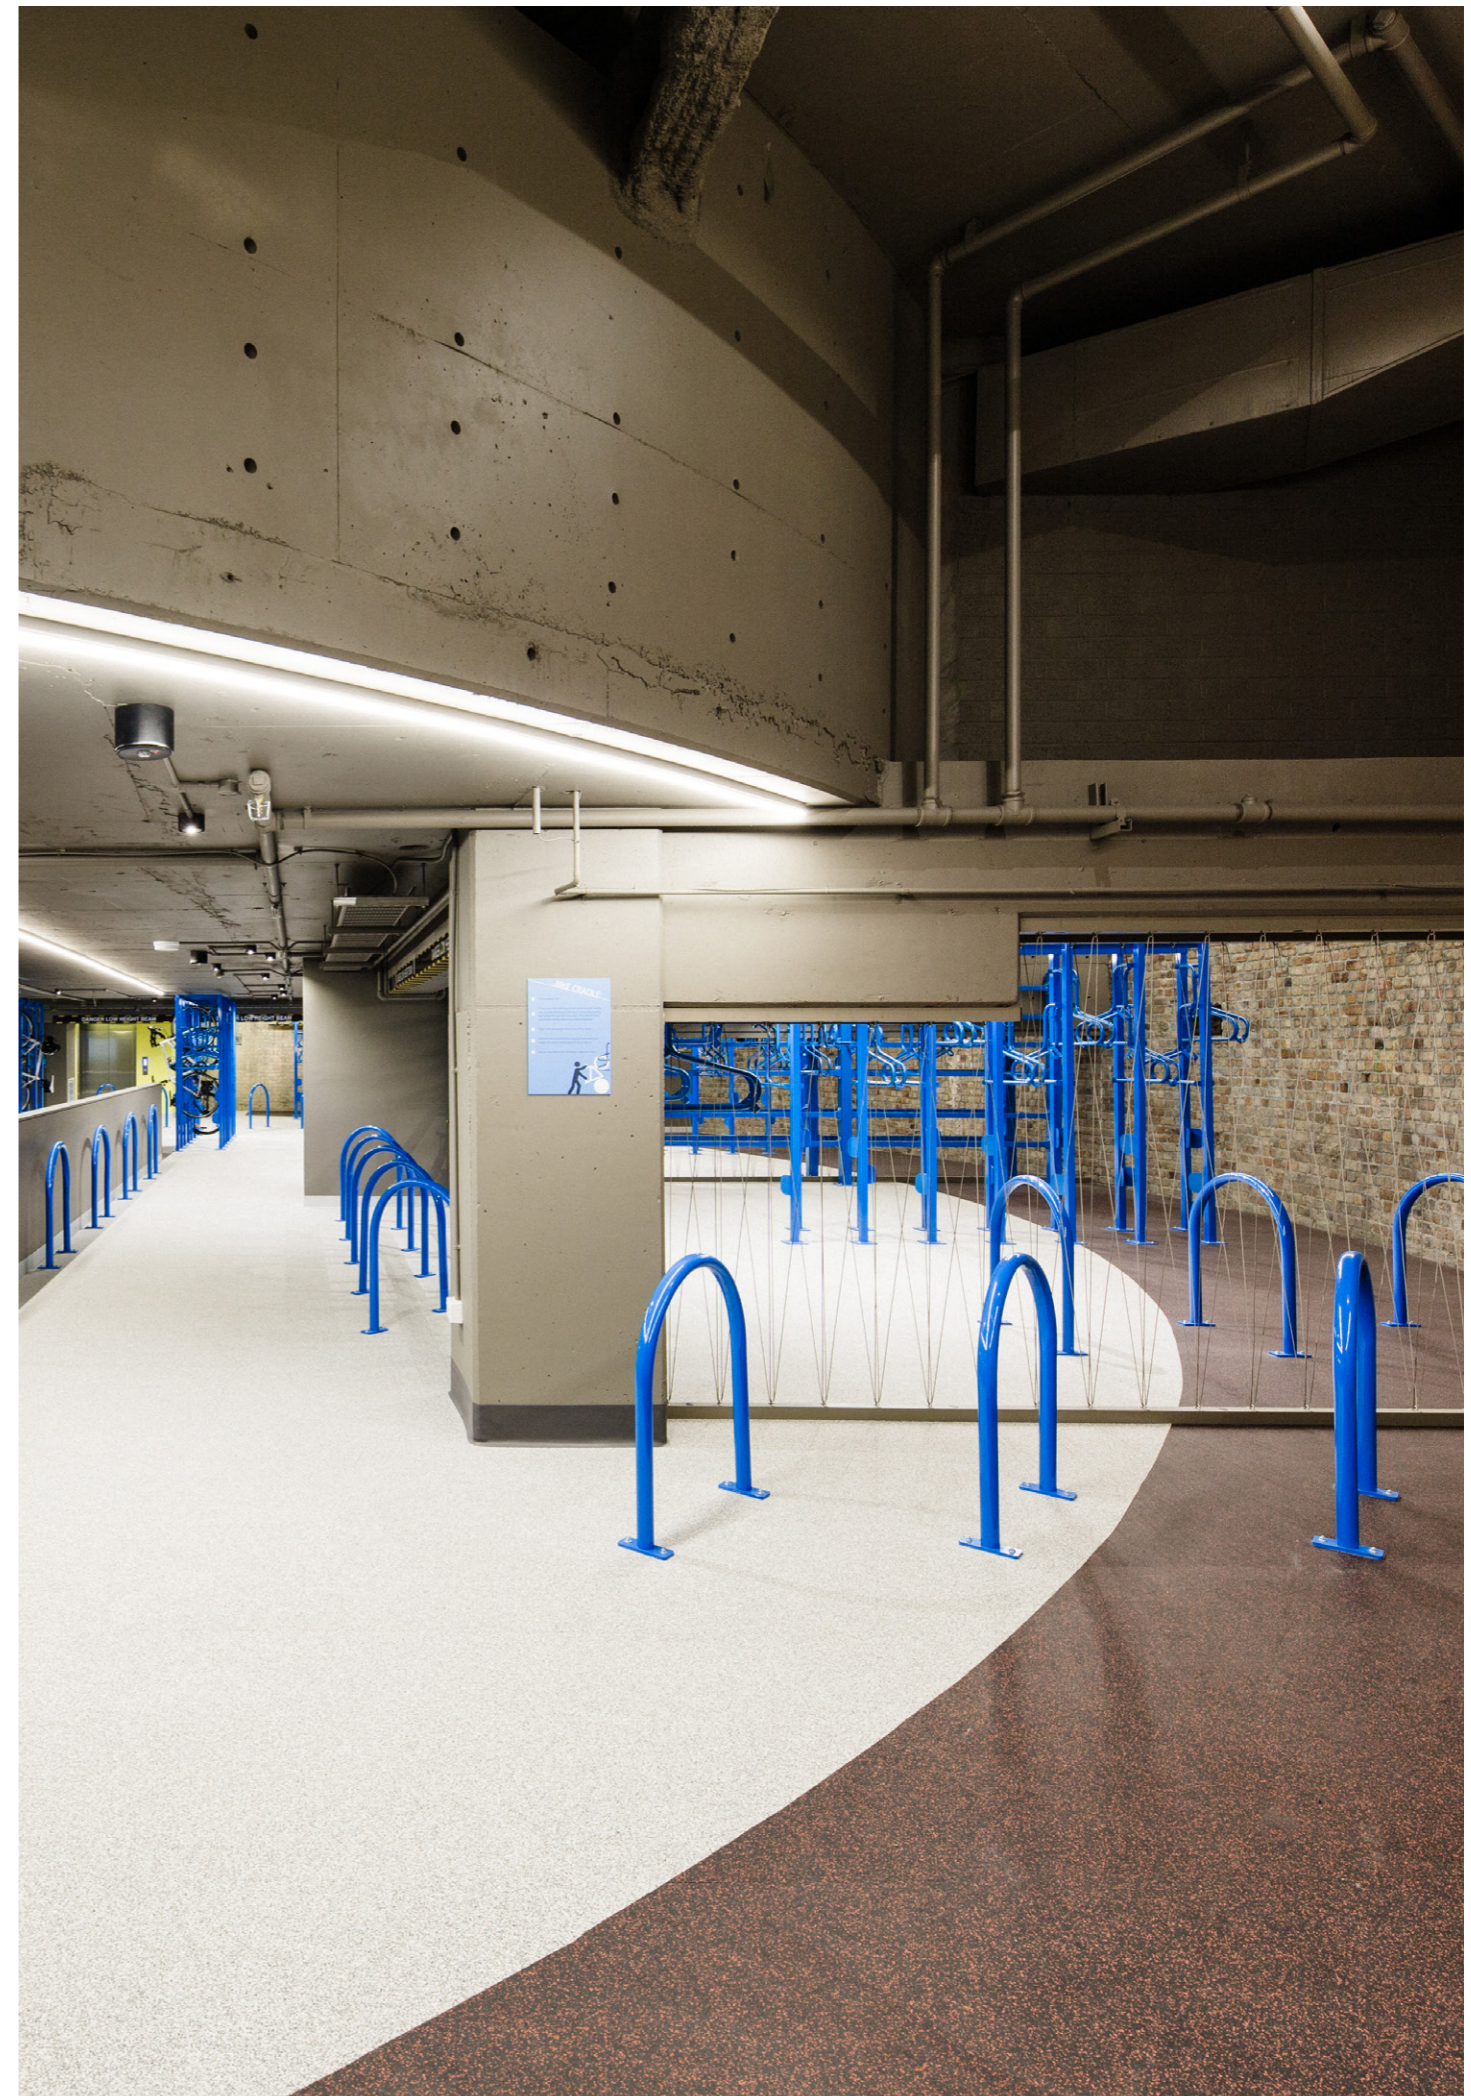

Refer to page 36 for information on colours and ranges.

Individual design

You have the option of including logos, lines or lettering into your floor. This can be done as inlays within the floor or using full colour UV inkjet technology.

Refer to page 34 for information.

OUR FLOOR FOR POOLS

Poolside perfection

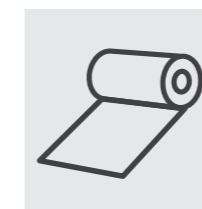

Pool areas should be safe, attractive, and comfortable for barefoot traffic. That's why we offer flooring solutions for every setting. Our **REGUPOL everroll** range is perfect for competition, public, and exercise pools and their surrounds, providing durability and comfort underfoot.

For indoor pool environments, consider our **REGUPOL everroll ultimate** range, which is specifically designed to enhance indoor spaces. And for outdoor pool areas, we have the dedicated **REGUPOL everroll savanna** range that stands up to harsh UV exposure and maintains the aesthetic appeal of your poolside.

In addition, these **REGUPOL everroll** ranges offer enhanced slip resistance, ensuring safety and stability in both indoor and outdoor pool environments.

You can also extend the same look and feel of your pool areas to tiered seating, bleachers, walkways and even changing rooms.

Available in:

Natural rolls

Ranges: **REGUPOL everroll savanna** (3 mm indoor & outdoor areas), **REGUPOL everroll ultimate** (4 mm indoor)

Refer to page 36 for information on colours and ranges.

Pool personalisation

You can add logos, markings or lane numbers to make your pool area even more attractive or exciting to your customers.

YOUR SPACE YOUR STYLE

Custom logo inlays directly embedded into your flooring. Here's how it works.

REGUPOL's rubber flooring customisation service is designed to cater to a diverse range of design needs. With the ability to incorporate intricate logos, motifs, and geometric shapes, the service offers cutting for both small contoured inlays and large area designs.

Our computer-aided cutting machines ensure that every aspect, regardless of scale, is executed meticulously. This flexibility in sizing and cutting allows **REGUPOL** to deliver a tailored solution that meets the unique specifications of each space.

Whether it's a corporate space or sports venue facility, **REGUPOL's** custom inlays transform your flooring into a work of art!

We place a strong emphasis on ease and assistance throughout the design process. Recognising the importance of precision in design, we offer support to ensure your vision is realized with meticulous attention.

Individual design

You have the option of including logos, lines or lettering into your floor. This can be done as inlays within the floor or using full colour UV inkjet technology.

HOW DO YOU GET TO THE TOP? **TOGETHER.**

When you partner with REGUPOL, you become part of a community with a shared goal of leading with excellence and innovation. Our path to success has always been rooted in product innovation and great service, with an eye on the future. We transform over 90,000 tons of high-quality recycled materials every year to create products that meet and exceed industry standards.

Over the course of our 70-year journey to become a leader in our category of building materials, we have built up a wealth of expertise and forged long-term customer partnerships in 132 countries worldwide—like sprint legend Usain Bolt, who made history on our blue **REGUPOL** running track in Berlin's Olympic Stadium in 2009 when he set two world records.

"There's nothing like running on REGUPOL. To me, REGUPOL equals gold. In more ways than one." - Usain Bolt

We've got it covered.

750 employees

11 locations worldwide

90.000 tons of high-quality recycled materials per year

132 countries with satisfied customers

OUR UNPARALLELED ENVIRONMENTAL STANDARDS

We understand that your choices play a pivotal role in shaping the future of spaces where people live, work, and connect.

At **REGUPOL**, we share your commitment to creating environments that not only meet high-quality standards but also contribute to sustainable and vibrant communities.

However, not all resilient flooring products are created equal. **REGUPOL** stands as the only rubber flooring manufacturer with:

- An Environmental Product Declaration (EPD)
- GECA (Good Environmental Choice Australia) certification
- Cradle to Cradle certification

This unique combination reflects our dedication to environmental and social responsibility, providing you with flooring solutions that strive to lift conventional industry standards.

We think long term

Developing socially responsible, sustainable solutions is part of **REGUPOL's** core mission. Our collaborative approach with customers, a philosophy of constant improvement and strong environmental responsibility, motivates us to continue developing innovative sound suppression products that are easy to use, cost-effective and of the highest standards.

How sustainable are REGUPOL products?

The circular economy works when recycled products compete directly with newly created products from raw materials – and we have been proving this for over 65 years. **REGUPOL** products are typically made from 75% to 95% recycled materials, with a selection of application-specific products made from raw materials.

OUR ACCREDITATIONS

GECA
As Australia's leading environmental certification program, certification with the GECA ecolabel indicates that the environmental performance of a product has been certified from a multicriteria perspective, and are verified as environmentally preferable by GECA. Our certified products attribute to many green building programs including Green Building Council of Australia (GBCA) Green Star program (Level A), WELL Building certification and ISCA's IS program.

NATSPEC
As the preferred specification system for building professionals, NATSPEC branded worksections are endorsed by Government departments, contractors, consultants and architects alike. We are proud to be a NATSPEC Product Partner, offering a national specification for our ranges of resilient floors. This will assist you in specifying REGUPOL everroll with various floor finishes on your project.

CRADLE TO CRADLE CERTIFIED®
REGUPOL has successfully achieved Cradle to Cradle Certified® Bronze. The Cradle to Cradle Certified® products program provides the framework to assess the safety, circularity and responsibility of materials and products across five categories of sustainability performance: Material Health, Product Circularity, Clean Air & Climate Protection, Water & Soil Stewardship and Social Fairness. Cradle to Cradle Certified® is a registered trademark of the Cradle to Cradle Products Innovation Institute.

INITIATIVE NEW LIFE
As a founding member of the Initiative New Life, REGUPOL is committed to an optimal recycling economy. Jointly, the members aim to showcase the advantages of recycling products from ELT (End-of-Life Tires) and motivate more sustainable choices. Find out more at www.initiative-new-life.de/en/

HOW ARE SOLUTIONS EASY AND INSPIRING? **TOGETHER.**

We've got it covered.

REGUPOL is more than sports and multi-purpose surfaces. More than our acoustic underlayments. And more than our state-of-the-art track and field surfaces. For over 70 years, providing solutions and delivering exceptional customer service has been our business. We understand that paying attention to the details is critical from the start of any project. Making changes later means inconvenience and additional expenses. We sweat those details so you don't have to.

Because we invented the technology to recycle end of life tyres into unique products, you benefit from decades of experience and expertise that only we can offer. That means the right information, advice, and answers when you need them, along with products that have been refined, tested, and retested over the years by our R&D team to deliver precision performance that will not disappoint. It is all accomplished with manufacturing that meets the highest quality standards with the strictest environmental requirements.

Delivering results, developing leaders worldwide

We have grown steadily since 1954 – new products developed, new subsidiaries established and new locations added.

Today, **REGUPOL** is still a family enterprise, with third and fourth generations currently working in company management. We have eleven offices in seven countries, all serving as epicentres for innovation, ingenuity, and community.

Behind every **REGUPOL** product, there is a talented team that works together, across the globe, to create performance solutions from reclaimed materials that deliver durability and protection where you need it most without sacrificing sustainability. Whether used to protect surfaces and optimize load transport or to dampen sound and vibration, **REGUPOL** gets it done. We deliver with a level of product, customer service, and investment that only the inventor can offer.

No matter the customer – we aim to make their experience easy and inspiring, at an only-at-**REGUPOL** value.

Ask the experts about the best solution for your project.
